

CDM Awareness

Overview

The Construction (Design and Management) Regulations (CDM) impose a statutory framework for the management of health and safety in construction. They place duties on everyone involved with construction work including clients, designers, professionals, main and subcontractors and site workers. They support and interact with a number of other key pieces of construction-related safety legislation.

Fully updated for 2007.

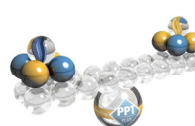

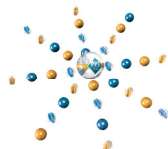

Duration

One day

Benefits to you & your organisation

By the end of the course delegates will be able to:

- Understand the legal responsibilities placed on different parties by the CDM Regulations and specific to the role of the Principal Contractor
- Understand how the Construction Health Safety and Welfare Regulations 1996 links with CDM in respect of the Principal Contractor.
- Understand the practical implications of the responsibilities of a Principal Contractor under CDM
- Recognise the types of information that are needed to form part of the health and safety plan and the health and safety file required by CDM

Course content includes

- Hazard management and risk assessment on site
- Construction Design and Management Regulations
- Overview of client duties
- Overview of designer duties
- Overview of CDM Coordinator
- Principal contractors duties and the Construction Phase Plan
- Contractors duties
